

Supplementary Table 3: Biomarker Levels at Baseline and follow-up in 62 patients included in the Cardiotoxicity study

Biomarker	Baseline ( $\pm$ st dev)	3 Months ( $\pm$ st dev)	6 Months ( $\pm$ st dev)
MPO (ng/mL)	0.95 (1.47)	1.627 (4.73)*	-
PlGF (pg/mL)	176.0 (123.2)	144.3 (99.47)	-
cTnI (ng/mL)	4.92 (2.88)	5.221 (2.23)**	-
VEGF (pg/ml)	378.71 (288.67)	-	38.05 (64.86)***

Values are Mean  $\pm$  Standard Deviation

MPO = Myeloperoxidase, PlGF = Placental Growth Factor, cTnI = Cardiac Troponin I, VEGF = Vascular Endothelial Growth Factor.

P < 0.05\*, < 0.01\*\*, < 0.001\*\*\* comparing Follow-up to Baseline measurements of each biomarker (Wilcoxon Signed Rank tests).
